

These Supplemental Insurance Terms and Conditions shall concern UNION Vienna Insurance Group Biztosító Zrt.'s PrivateMed Next health insurance contracts, provided that the contract is concluded with reference to these terms. As regards any issues not regulated in these Supplemental Insurance Terms and Conditions, the Policy Terms and Conditions of the Insurer's PrivateMed Next health insurance (hereinafter referred to as: "Policy Terms and Conditions") shall be applicable.

The parts of the customer information document prepared as prescribed by Annex 4 of Act LXXXVIII of 2014 on the Insurance Business (Insurance Act) are in bold type, while the conditions deviating from those included in the Civil Code and/or the general policy conclusion practices are in italic type.

The screening packages herein cannot be taken out individually, only in combination with the PrivateMed Next group health insurance Start, Extra or Business packages, at the time of taking out the base package or at any of the subsequent policy anniversaries, provided the policyholder of the basic insurance is not a natural person.

- **respiratory function test**
- **bidirectional chest x-ray**

2. Process of using the screening tests

The examinations of the selected screening package may be claimed once each year. The Insurer provides the screening package as one, meaning that the care organiser arranges the appointments for all the elements of the package at one time. The insured can give up on any of the elements of the package, but it means that in the insurance year given he/she cannot apply for the elements that he/she has been given up earlier in that insurance year.

The policyholder or the insured person communicates the claim for benefits to the care organiser.

The location of the screening test is determined by the care organiser, taking the geographic preferences of the policyholder or the insured person into consideration.

The care organiser cannot guarantee that all examinations and test of the given screening package will be performed at the same time and at the same location.

The care organiser arranges the performance of the tests for the insured person, and notifies the

policyholder or the insured person of the place and time of the tests within 30 days of application. If the screening test was initiated by the policyholder, the policyholder informs the insured persons of the place and time thereof.

The healthcare provider sends the results of the screening test performed to the insured persons within 30 business days, in the manner specified by the insured persons (by post or electronically).
